Post

Canonical
@Canonical

Compliance teams are under pressure to meet strict security requirements without slowing down innovation.

On July 1, join @Canonical's Henry Coggill, and Devin Breen for a practical webinar on how Ubuntu and Ubuntu Pro can support compliance with security standards like FIPS, FedRAMP, FISMA, CMMC, and DISA-STIG.

The session will cover OS-level requirements, hardening automation, vulnerability management, and securely-designed Ubuntu deployments across enterprise and public sector environments.

Register now to join the webinar: ubuntu.com/engage/complia...
